## PROJECTS / OPEN-SOURCE

---

### E-commerce Website | [Link](#)

*Next.js, TypeScript, Tailwind CSS*

The E-commerce App is a responsive shopping platform built with Next.js, TypeScript, and Tailwind CSS, allowing users to browse products, add them to their cart, and complete the checkout process with a seamless, dynamic experience.

### Simple Messaging Sending Platform | [Link](#)

*PHP, MySQL, HTML, CSS, JavaScript*

SMSG is a messaging app built with PHP and MySQL, enabling users to send SMS messages with a simple interface for managing requests and data storage.

### todo app | [Link](#)

*React, TypeScript, CSS, JavaScript, HTML*

The To-Do List App is a task management tool built with React and TypeScript, allowing users to efficiently add, update, and delete tasks with a clean, user-friendly interface.

### recipe-app | [Link](#)

*JavaScript, CSS, HTML*

The Recipe App is a web app built with JavaScript and React that lets users browse recipes, view ingredients, and explore instructions, fetching data dynamically from a free API.

### weather-app | [Link](#)

*JavaScript, HTML, CSS*

The Weather App is a weather forecasting tool built with HTML, CSS, and JavaScript, allowing users to check real-time weather conditions and forecasts from an external API with a user-friendly interface.

### emoji-world | [Link](#)

*React, JavaScript, HTML, CSS*

Emoji World is an interactive website built with JavaScript, React, and Tailwind CSS that lets users explore and search for emojis. The app provides an easy-to-use interface for finding emojis by name or category and allows users to copy them to the clipboard for sharing across platforms.
